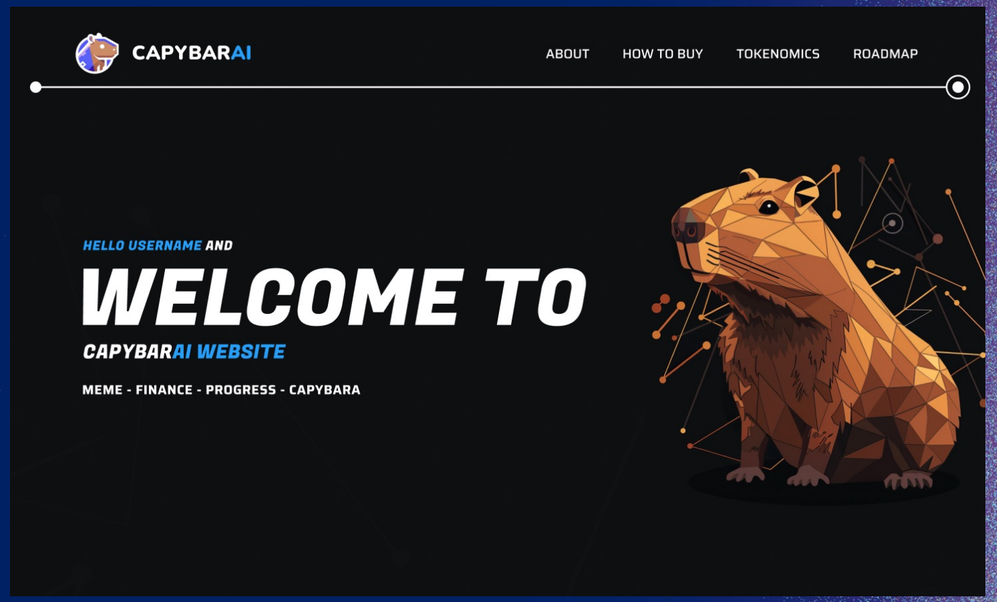
FOR BUSINESS CAPYBARAS: business@capyai.tech

ABSTRACT

Capybara AI is a groundbreaking project that stands out by employing a capybara, trained via artificial intelligence, to conduct cryptocurrency trades within the Solana blockchain ecosystem. This unique approach not only showcases an innovative use of technology but also introduces a novel engagement method in the crypto trading space

INTRODUCTION

·**Purpose:** Capybara AI aims to revolutionize the cryptocurrency market by combining artificial intelligence, the engaging appeal of capybaras, and digital currencies to create an innovative trading experience.



INTRODUCTION

·**Solution Overview:** In a market craving innovation and deeper engagement, Capybara AI emerges as a solution. By involving a live capybara in trading decisions, backed by AI, it offers a fresh and engaging approach to cryptocurrency trading, addressing the need for innovation in the space.

MARKET RESEARCH

Potential Clients:

Our target market includes cryptocurrency enthusiasts looking for innovative investment opportunities, animal lovers, and those interested in the integration of AI with real-world applications.

Market Share and Competitors:

While the crypto market is crowded, Capybara AI's unique proposition sets it apart, carving out a new niche. The project aims to capture the interest of users seeking novelty in addition to financial returns.

Long-term Perspectives:

As the market evolves, Capybara AI plans to adapt by incorporating more advanced AI and expanding its animal-assisted trading model, securing a forefront position in the fusion of technology, finance, and animal behavior

USER PERSONAS

User 1

•The long-term investors who believes in potential of growing up crypto coin projects.

User 2

•The meme coin trader who will add up the liquidity to the coin.

User 3

•Typical crypto investors who willinteract with the product of the project.

STAKEHOLDERS

1

Crypto Traders / Investors

2

DEX and non-Dex crypto exchanges

3

Development team who is responsible for the structure development

4

Marketing team who is responsible for promoting the project

RESOURCES

1. Skilled AI developers
2. Capybara caretaker
3. Market-maker
4. Experts in marketing
5. Initials funds for liquidity providing

DEPENDENCIES

Successful collaboration with blockchain technology providers and crypto exchange approval for adding the Capybara AI token. The current state of the crypto market.

MARKETING STRATEGY

1

Our strategy focuses on leveraging social media platforms (Telegram, Twitter) to showcase the activity of the project such as providing events, selling merch for Capybara AI, conducting capybara trading live streams and showing the trading results.

2

Provide interactive campaigns where crypto-holders can use their tokens to make the decision of the future the capybara and the project.

3

•Make partnerships with the social media influences, crypto exchanges and others who will provide benefits for the project growth.

OPERATIONAL PLAN

•The initial phase begins with creating the Capybara AI token on the Solana blockchain, followed by developing a dedicated website and establishing a presence on social media. Subsequently, we'll develop AI training for the capybara alongside establishing care protocols, before setting up live streams that enable interactive user engagement with the capybara's trading activities.

FINANCIAL PLAN

- Plan involves raising initial funds through a project presale, dedicated to purchasing a capybara and creating a comfortable living and training environment. Expenses for AI developers to craft training models will be covered by commissions from trading transactions and strategic market engagements, ensuring a sustainable financial model.

FUNDING SOURCES

Exploring venture capital, crowdfunding platforms, and potential partnerships within the blockchain industry to secure the necessary capital for development and operational scaling.

ROADMAP

1. **Launch of Website and Social Media:** Establish an online presence to connect with our community and share updates.
2. **Presale Launch:** Initiate the presale of Capybara AI tokens to raise initial funds and gauge community interest.
3. **Capybara AI Token Launch on DeX Exchanges:** Introduce our token to decentralized exchanges, making it accessible to a wider audience.
4. **Purchase and Setup for Capybara:** Acquire a capybara and create a conducive environment tailored for comfort and optimal trading training.
5. **Develop First AI Training Model:** Create a specialized AI model to educate our capybara on cryptocurrency trading fundamentals.
6. **Launch Capybara on MEXC Crypto Exchange:** Debut our trained capybara's trading activities on a leading crypto exchange platform.
7. **Live Streaming Platform Setup:** Implement a system for broadcasting the capybara's trading sessions live, enhancing transparency and engagement.
8. **Enable User Interaction:** Integrate features allowing users to influence trading decisions, such as selecting cryptocurrency pairs for the capybara to trade.

CONCLUSION

•In conclusion, Capybara AI uniquely blends AI, cryptocurrency trading, and the charm of capybaras to innovate in the crypto space. Our roadmap from token sale to live trading interaction showcases our commitment to engagement, innovation, and market transformation. Join us on this journey to revolutionize crypto trading inclusively and interactively.

THANK YOU!
